

## Seminario regionale

ENGAGING PATIENTS FOR PATIENT SAFETY

Il coinvolgimento dei pazienti e dei cittadini nella sicurezza delle cure

## Care4Today<sup>®</sup>: una app per i pazienti di chirurgia toracica

Dr Piergiorgio Solli

UOC Metropolitana Chirurgia Toracica & Trapianto di Polmone

IRCCS Az. Osp Univers Policlinico S.Orsola BOLOGNA

Bologna, 22 settembre 2023

# BACKGROUND

## PERI-OPERATIVE TIME ESSENTIAL PHASE IN THOR SURGERY PATIENT'S

EARLY FOLLOW-UP WITH INTENSE MONITORING  
AS AN INTEGRAL PART OF THE PATHWAY

ADEQUATE PSYCHO&PHYSICAL  
PREPARATION KEY FACTOR FOR  
SUCCESSFUL PROCEDURE

CLINIC

SURGERY

DISCHARGE

## #1 FACILITATE COMMUNICATION AFTER DISCHARGE (daily vs planned follow-up visit)

- ✓ MAKING INFORMATION EXCHANGE BETWEEN SURGEONS AND PATIENT MORE DIRECT, EASILY ACCESSIBLE, RELIABLE AND SPECIFIC
- ✓ CREATE A REMOTE CONNECTION, REDUCING THE NEED FOR HOSPITAL ACCESS (reduced costs for patients and equal accessibility to care)
- ✓ CATCHING PROMPTLY ONSET OF PROBLEM or COMPLICATIONS RELATED TO SURG
- ✓ IMPROVE PATIENT COMPLIANCE IN POST-OPERAT TIME (anxiety, drug management, ...)
- ✓ DESIGNED TO COMPLEMENT HOSP PROCESSES and COVER BLIND SPOTS WITH LESSER COVERAGE

# METODI / 1

Mobile APP (Android or iOS) + Health Care Professional portal (HCP)  
set of pre-defined questions sent to the patient to trigger a response  
as they unlock their smartphone, multiple times per day

Based upon reply, notifications are sent to HCP to evaluate if any actions are to be taken

## Disease Specific Quest.

Pre-defined questionnaires

Pre and post surg setting,  
including: Pain - Wound -  
Activity levels - Diet

## Smartphone Pat App

App pushes questions via  
notifications

Android & iOS compatible

In local language

## HCP Portal & Notifications

HCPs receive emails or  
notifications if answers are  
outside a range

Allows analysis of individual or  
collective results (dashboard)

# METODI / 2

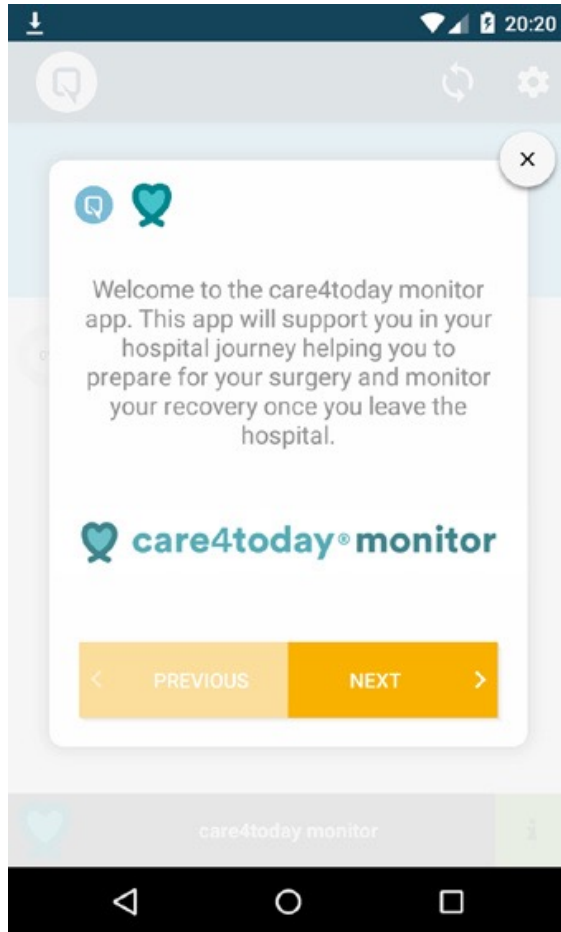

- Pre-Surgery
- Safety & Pain
- Wound Infection
- Recovery Activity
- Motivation
- Nutrition
- Smoking Cessation
- Patient Satisfaction

+

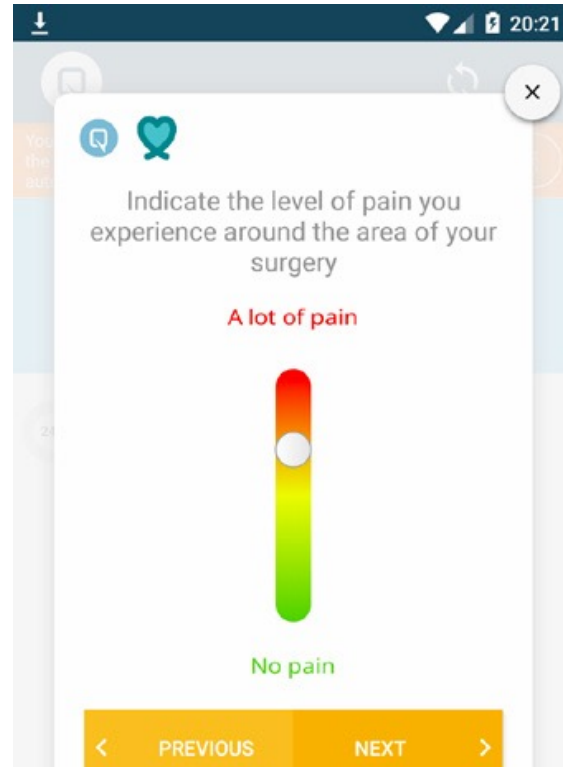

SPECIALTY SPECIFIC  
QUESTIONS breathing,  
FKT exercise, drain site,  
cough, thoracic pain, ...

postop day1-15	everyday
postop day16-30	every 4days
automatic email if orange/red alert

# COINVOLGIMENTO PAZIENTI

# RISULTATI (17th August 2023)

60 pts enrolled (52 completed, 2 in-hosp, 6 discharged)

Median age 58.6yrs (range 19-82)

Lung Cancer 85%, Mediastinal Tumour	15%
Minimal invasive surg (VATS/Robotics)	93.3%
Median Hospital Stay	4.6 days

Overall number of questions sent 5221, adequate reply 4048 (77.5%)

Orange alert 455, RED alert 27

Medical intervention required in 13.2 % of cases (phone consultation)

2 pts re-admission (pneumothorax, kidney stones), surgery 0

Orange and red alerts more frequent during 1° week ( $p=0.001$  &  $0.006$ )

Customer satisfaction index 7.8/10

## LIVELLO IMPLEMENTAZIONE

- ✓ support patients between appointments with aftercare reminders
- ✓ long term follow-up (2 x year, 1 x year)
- ✓ reingeneer specific question toward specific topics at a specific time
- ✓ more than lung cancer surgery only
- ✓ more user-friendly? (7.8/10...)

## TRASFERIBILITA'

- ✓ any hospital, any unit, any speciality

Doctor/s focused for many hours/day...

# CONCLUSIONI

- ✓ excellent tool for patient's monitoring
- ✓ easy to use even in elderly population
- ✓ room for improvement (7.8/10...)
- ✓ should be regarded as a full-commitment activity
- ✓ maximal benefit if part of a routine (tele-health)
